

## BIO

Greetings! My name is Dr. Sandesh Shrestha (PharmD). I am passionate about using data to reveal important insights. I'm a full-time student at the University of North Texas, where I'm pursuing a master's degree in advanced data analytics. I'm originally from the charming city of Kathmandu, Nepal.

I received my PharmD (Doctor of Pharmacy) from the esteemed Rajiv Gandhi University of Health Sciences in Bangalore, India, where my academic career began. My education in pharmacy has acted as a springboard for my investigation into the revolutionary topic of data analytics.

I have five years of extensive expertise in clinical research, and I've refined my ability to navigate the complexities of research procedures. My viewpoint has been greatly shaped by this professional path, which has also deepened my awareness of the role that data plays in improving healthcare solutions.

Outside of the classroom and the workplace, I'm a passionate traveler who looks to the many different environments and cultures that the globe has to offer for inspiration. I use photography as a creative outlet that helps me to distill the essence of my experiences, not merely as a hobby.

I admit that I'm a self-confessed gadget geek who enjoys staying up to date on the latest technological advancements and staying in the IT sector. I'm a passionate gamer who uses virtual environments to unwind and explore my love of gaming as a diversion from my analytical nature.
